

SMART Podium™ 624

Deliver dynamic presentations

The SMART Podium interactive pen display with touch helps business professionals, trainers, first responders and military personnel communicate more effectively. While projecting to a large display, presenters can add notes or illustrations on the touch screen. Meetings are more collaborative when colleagues capture ideas, questions and feedback in the presentation while facing the audience.

 SMART Meeting Pro software included.

Increase audience engagement and collaboration with effective, interactive presentations.

SMART Podium interactive pen display includes SMART Meeting Pro® software featuring SMART ink™. Presenters can use the cordless, battery-free pen or their finger to write over any file type on the fly to collaborate with the audience on key points, improving efficiency.

Features

SMART ink

SMART ink lets you write over websites, videos, and into PDFs and Microsoft Office® files, and save your notes in almost any file type.

Intuitive interaction

The display ignores a palm resting on the screen, enabling presenters to comfortably write over websites, videos and files. Presenters can use gestures to move, manipulate (pinch, zoom, rotate, flip) and save their notes and illustrations.

24" Full HD touch screen

Featuring 10 touch points and 4 pre-set buttons (black, blue, red and SMART ink), presenters have almost unlimited ways to annotate content. The anti-glare surface with Silktouch™ frictionless feel, Full HD (1920 x 1080) resolution and adjustable stand provide uncompromised touch experience and image quality.

Cordless pen

The cordless, battery-free pen gives presenters the freedom to write notes without limiting body language. With an eraser and mouse-click functionality, the cordless pen has everything presenters need to navigate content. Optional tether included.

Display flexibility

HDMI, DVI-I (in/out, HDCP-compliant), USB ports and VGA adaptor cables, enable SMART Podium to be connected to any projector or large format display, such as a SMART Board®, making it easy to show presentations large enough to be viewed clearly in meeting rooms of any size.

SMART Meeting Pro

This powerful visual collaboration software allows users to create and capture ideas in the virtually unlimited interactive Unbound Workspace, as well as make notes over any available application to keep meetings organized and easily communicate outcomes.

Sample Uses

Group presentations and meetings

- Business boardrooms and auditoriums
- Corporate training or meeting rooms

Command and control centers

- First responders (Police/Fire/EMS)
- Search and rescue operations
- Wildlife management
- Military mission planning

Primary display for personal use

- Office or remote workers
